

SmartGauge Battery Status Monitor

The new SmartGauge is an easy-to-use, highly advanced, digital battery display with a host of features. This makes it the ideal choice where a fit and forget solution is required to the never ending worry of "how much power do we have left in the batteries?"

The SmartGauge is a highly accurate state of charge meter. It is very simple to install and cannot run out of synchronisation with the batteries. The display shows charge status as a percentage or as volts and has user programmable alarm functions.

Other features include: automatic compensation for battery ageing, incorrect charge regimes and battery sulphation. Automatic correction algorithms giving more accurate readings with time.

Key benefits:

- 12 or 24 volt operation.
- Simple, very quick, 2 or 3 wire installation.
- Shuntless design retains factory warranties.
- Simple operation reduces training requirements.
- Automatic self-setup and adjustment.
- User programmable alarm output.
- Technician's security lock.
- Self compensation for battery ageing.
- Interface to SmartBank split charge system.
- Surface mount for quick, easy installation.

When interfaced with the SmartBank split charge system, SmartGauge gives the user the most sophisticated, automatic split charge and battery monitoring system currently available.
